Type and design of system: FOR RV USE WITH HAULED WATER: INSTALL A MIN 1250 GAL VAULT WITH SEALED OUTLET AND FLOAT LEVEL INDICATOR. MAINTAIN LCDHE SETBACKS. CALL FOR INSPECTION PRIOR TO BACKFILL. USE SCHEDULE 40 FOR DRIVEWAY CROSSING.

Conditions:

Cond: HLTH1

Pump tank every 3-4 years

Septic permit number: 15-H0204

Property location: 534 BLACKFOOT RD RFL

Permission is hereby granted to the owner or his agent to perform the work indicated below in accordance with the Larimer County Individual Sewage Disposal Regulations and is conditional upon the final installation approval of the Larimer County Department of Health and Environment. This permit is to remain in full force for the duration of the Larimer County Building Permit, or 120 days after its issuance, where applicable, providing it is not revoked for noncompliance. The issuance of this permit does not constitute assumption by the Department or its employees of liability for the failure or inadequacy of the sewage disposal system.

Owner/agent signature: _____

Please notify the department 48 hours in advance of backfilling to obtain final inspection for issuance of "Occupancy Certificate".

Septic tank - gallonage size: 2000

Are you currently a member of the Water and Sewer Association? Yes ☒ No ☐	
NOTE: Membership in the Association is required before installation of any facilities.	

This is to inform the Crystal Lakes Water and Sewer Association that a wastewater disposal facility is being proposed for the above property. I understand that this form must be presented to the Larimer County Department of Environmental Health to confirm that the Association is aware of this facility.

Completion of this form may result in a change in the assessment status of the property.

The following information must be submitted prior to ANY construction of wastewater facilities.

1. Type of wastewater disposal system to be installed:

☒ Sealed vault: 2000 gallons
☐ Septic system with leach field: gallons solids vault
☐ Community sewer line
☐ Evapotranspiration System: Other:
(Describe)

2. Type of water system now serving your property or to be installed:

☐ Cistern
☐ Private well
☐ Joint well
☐ Community water line
☐ Developed spring
☒ Other: RV Holding Tank
(Describe)

3. **Larimer County Health Department regulations require you to submit a scaled plot plan showing locations of the following:**

- All existing and proposed buildings and driveways
- Existing or proposed individual sewage disposal systems
- Any existing or proposed well on the property and the distance from sewage system to be installed
- Neighboring wells
- All domestic water lines
- All drainages, gullies, streams and lakes

Please attach a copy of your plot plan to this notification.

4. **Sealed vaults and septic systems require an Individual Sewage Disposal System (ISDS) Permit from the Larimer County Department of Environmental Health. If you are requesting a permit to install a septic system with leach field, you will be required to excavate a profile hole to determine the suitability of your site for a leach field before submitting your application to the County.** (ISDS Information available at CLA office if needed).

Upon request, the Association will excavate the profile hole for a fee, as established in the Dues & Fees Schedule. Please initial your approval of having a profile hole excavated by the Association.

(initial) _____ I wish to have the Association excavate a profile hole. (Owner is responsible for marking the location of profile hole and removal of trees to provide access). I hold the Water & Sewer Association harmless from any liability resulting from the Association's excavation of a test hole on my property.

☒ I do not wish to have the Association excavate a profile hole.

5. **All facilities must be installed in accordance with standards approved by the Larimer County Department of Environmental Health and the Crystal Lakes Water and Sewer Association. For sealed vault installations, install 3" pipe and quick couple to facilitate pumping and a mechanical or electronic level alarm to indicate when the vault is more than 80% full. For both systems, allow truck access to within 20 feet of the sealed vault or septic tank. Driveways must be at least 15 feet wide and have less than 12% slope.**

This form recognizes only the facilities noted herein. If any additional facilities are to be constructed, such facilities must be reported to the Association before construction begins. It is the responsibility of the property owner/contractor to install the facilities in accordance with all county and state health regulations.
