

# Groundworks

Raymond Leach,

Attached are the elevation survey results from both visits done on August 7<sup>th</sup>, 2025 and March 4<sup>th</sup>, 2026. The numbers on the left reflect the one performed on August 7<sup>th</sup> and the numbers on the right are the results from the survey done on March 4<sup>th</sup>.

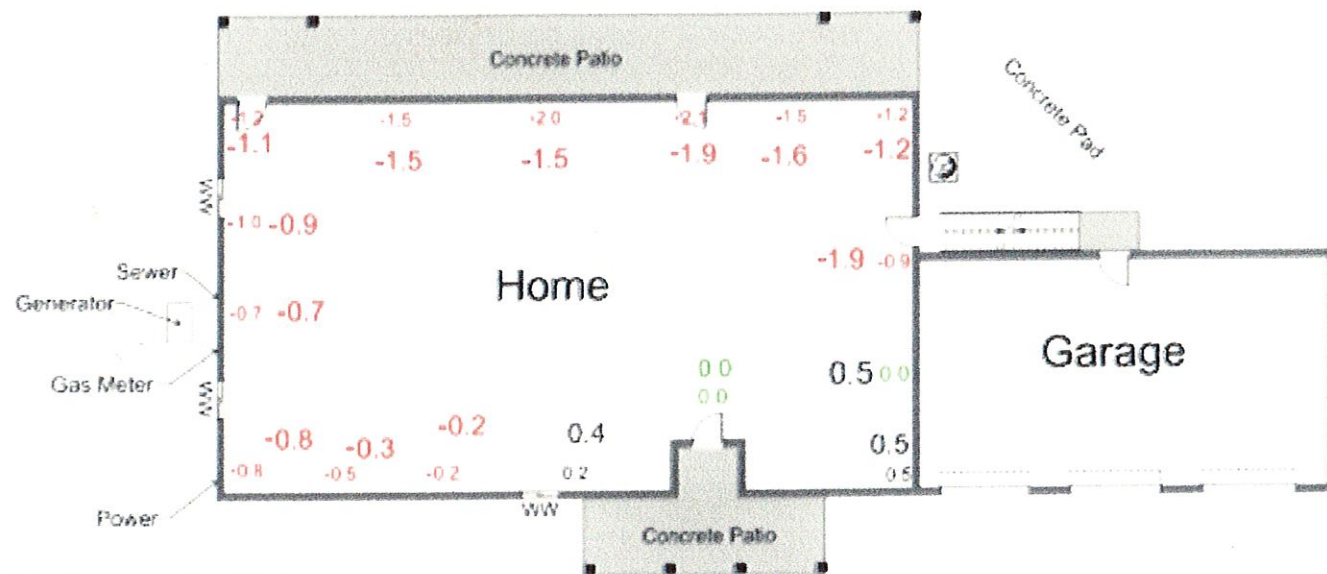

Yellowstone Structural Systems (YSS) completed a full perimeter helical pier installation at 31 Diamond Basin Road in Cody, Wyoming in 2019. Unfortunately, any original elevation surveys completed by YSS were lost during the acquisition process when Groundworks acquired the company.

Groundworks continues to honor all warranties originally issued by Yellowstone Structural Systems. As stated in the contract, the warranty is transferable with any change in ownership of the property. Please note that the warranty does not cover cosmetic damage as outlined in the warranty language.

Groundworks remains committed to ensuring the long-term stability of your property. Should continuous monitoring be necessary, we are willing to assist with additional elevation surveys at no charge.

If you have any questions, or if documentation is needed for a potential property sale, please feel free to contact our General Manager, Damian Branting, directly.

Sincerely,  
Damian Branting
